

Javier Ramos Humeres

Full Stack Developer

jiramos87@gmail.com • +56984193281 • Santiago, Chile • javier-ramos-humeres

github.com/jiramos87 • javierramos.dev

Full-stack developer with 4+ years of experience building production systems end-to-end, with the past year focused on generative AI in enterprise settings: integrating large language models (LLMs), intelligent agents, and agentic tooling for a U.S. biotech SaaS. Specialized in TypeScript, Node.js/NestJS, React/Next.js, and Python, with REST/GraphQL APIs, scalable serverless microservices, and CI/CD with DevSecOps. Focused on AI-assisted development with Claude Code and Cursor, and on end-to-end delivery grounded in software-engineering fundamentals (DDD, automated testing via TDD, SDD, Clean Architecture, SOLID). Cloud experience on AWS and GCP. I'm looking to contribute to high-impact projects that combine solid full-stack development with generative AI.

PROFESSIONAL EXPERIENCE

Software Engineer - TeselaGen

08/2025 – Present | Santiago, Chile (Hybrid)

- Developed for the generative-AI platform of a biotech SaaS: contributed to building a specialized AI agent and led the v1-to-v2 migration of the API that powers the AI copilot (LLM agent) and its Custom Tools: 58 controllers and 182 REST endpoints in NestJS, with clean architecture and automated testing via TDD.
- Built a tool-chain for the end-to-end development cycle: Claude Code skills, an MCP server, and issue-to-PR automation, cutting per-controller migration time from ~1 week to ~1 day.
- Built the API's Python client SDK (auto-generated from the OpenAPI/Swagger documentation), which by design covers 100% of the v2 surface and exposes it for programmatic consumption.
- Built frontend and backend in React/Next.js and NestJS across multiple user-facing tools, including the data and integration layers that power generative-AI features, applying software-engineering principles such as DDD (Domain-Driven), TDD (Test-Driven), SDD (Spec-Driven), Clean Architecture, and SOLID.

Technologies: TypeScript, Node.js, NestJS, Python, React, Next.js, PostgreSQL, GraphQL, OpenAPI/Swagger, Claude Code, Cursor, MCP servers, Anthropic API, LangChain, LangGraph, Docker, GitHub Actions (CI/CD).

Backend Developer - Pinflag

05/2022 – 08/2025 | Santiago, Chile (Hybrid)

- Built end-to-end payment integrations (Klap, Transbank, Getnet) for custom Shopify checkouts: checkout flows, confirmation webhooks, reconciliation, refunds, and failure recovery for ~10,000 orders per month.
- Built an analytics backend that automatically collects and pre-aggregates ~10,000 monthly orders via hourly and daily cron jobs, with a Chart.js dashboard, Python scripts, and Excel/CSV export.
- Built scalable event-driven microservices on AWS Lambda and the Serverless Framework (webhooks, SNS/SQS queues) for payment integrations and customer notifications (~1,000 monthly messages via the WhatsApp API).
- Applied software-engineering principles such as DDD (Domain-Driven), TDD (Test-Driven), SDD (Spec-Driven), Clean Architecture, and SOLID.

Technologies: Node.js, Express, TypeScript, React, Python, Django, FastAPI, PostgreSQL, MongoDB, Sequelize, Claude Code, Cursor, AWS (Lambda, S3, SQS, SNS, SES), Serverless Framework, Docker, CI/CD, Shopify, WhatsApp API.

PROJECTS

Chatbot IA – portfolio-app

2026 – Present

End-to-end LLM conversational agent; it can discuss topics relevant to my professional profile as a developer. Deployed in production.

Technologies: Python, LangGraph, Anthropic API, TypeScript, Next.js, PostgreSQL, Railway, Vercel, OpenRouter.

Agentic Dev Kit (open source) 2026 – Present

Spec-driven Claude Code skills and MCP server.

World Music Map2026 – Present

Interactive music discovery map. Next.js App Router (RSC), TypeScript, Prisma, PostgreSQL, MapLibre.

 EDUCATION

Software Engineering Diploma, Universidad de Chile 04/2025 – 08/2025 | Santiago, Chile

B.Sc. in Physics, Pontificia Universidad Católica de Chile 2005 – 2010 | Santiago, Chile

Full Stack Web Development, 4Geeks Academy 2021 – 2022 | Santiago, Chile

 PUBLICATIONS

Sound Synthesis of a Gaussian Quantum Particle in an Infinite Square Well.2014

Computer Music Journal (MIT Press) - Peer-reviewed; physics-based sound synthesis.

 SKILLS

Languages: TypeScript, JavaScript, Python, C#, SQL, **AI & Agentic Dev:** LLM integration (Anthropic API, OpenAI API), intelligent agents, MCP servers and tooling, Claude Code (desktop and CLI), agent skills and workflow design, Cursor, **Backend:** Node.js, NestJS, Express, Django, FastAPI, Flask, REST APIs, GraphQL, microservices, clean architecture, authentication and encryption, serverless (AWS Lambda), **BBDD:** PostgreSQL, MongoDB, **Frontend:** React (Hooks), Next.js, Tailwind CSS, Chart.js, **Testing:** Jest, bun test, Cypress, Playwright (unit, integration and e2e), **Cloud & DevOps:** AWS (S3, SES, SNS, SQS, Lambda), GCP, Docker, CI/CD, GitHub Actions, Heroku, Serverless Framework, **CI/CD:** Github/Heroku/AWS, **Specialized:** payment gateways (Klap, Transbank, Getnet), e-commerce (Shopify), order management, WhatsApp API.

 LANGUAGES

Spanish: Native • **English:** Fluent • **Portuguese:** Conversational
